PROPOSAL SUBMITTED
BY THE DELEGATION OF CHILE

INTERIM PROVISIONS
Draft Articles

INTERIM PROVISIONS

Draft Articles

I. RATIONALE

1. In the Chilean delegation's opinion, consideration should be given to the adoption of interim provisions to be applied during the period between the signing of the Convention on the Conservation of Antarctic Marine Living Resources and the adoption of the corresponding final provisions by the Commission following its entry into force, in accordance with the spirit of recommendation IX-2-11.
2. Essentially, those interim measures should set or determine maximum catches allowable and/or maximum harvesting applicable, on the basis of the fullest data available.
3. To ensure the efficiency of those provisions, it is essential to divide the area of application of the Convention into regions or subregions, designed to avoid undue concentration of harvesting. To this end, maximum partial catches allowable or maximum harvesting allowed should be established for each region or subregion.

Draft Articles

1. The contracting articles agree on the establishment of regions and of maximum catches and maximum harvesting allowed within the area of application of the Convention, based on areas of distribution and estimated abundance of populations of Antarctic marine living resources, for the period between the signing of this Convention and its entry into force.
2. The delimitation of the regions, the maximum harvesting and maximum catches allowed in each region are set down in Annex , which forms part of this Convention.
3. The interim provisions contained in the Annex will be applicable until, the entry into force of the pertinent provisions to be adopted by the Committee under the terms of Article VIII.6 and Article VIII.2 (b) and 2 (c) and of Article X.

ANNEXREGIONS AND PERMISSIBLE QUANTITIES OR EFFORTS

1. ALTERNATIVE I. (Based on the areas of distribution of whale populations, established in the International Convention for the Regulation of Whaling).

REGION	LONGITUDES	PERMISSIBLE QUANTITIES OR HARVESTING (*)
I	120°W - 60°W	
II	60°W - 0°	
III	0° - 70°E	
IV	70°E - 130°E	
V	130°E - 170°E	
VI	170° - 120°	

2. ALTERNATIVE II. (Based on the areas of distribution of Euphasia superba and considered an equidistant division of the area of application of the Convention).

REGION	LONGITUDES	PERMISSIBLE QUANTITIES OR HARVESTING (*)
I	120°W - 60°W	
II	60°W - 0°	
III	0° - 60E	
IV	60°E - 120°E	
V	120°E - 180°E	
VI	180°W - 120°W	

(*) Maximum permissible quantities: it would only be possible to estimate these for the principal species, fundamentally Krill.
